Projects

Jolly Match 3 Puzzle Game

Mobile match-3 puzzle game for [iOS](#) and [Android](#) with 100k+ downloads. As a Senior/Lead Unity Developer, I contributed to the development of gameplay features, monetization systems, analytics integration, and A/B testing infrastructure. I worked extensively with Firebase and third-party SDKs, optimized application performance across a wide range of devices, conducted code reviews, and mentored team members. Collaborated within a team of 12 specialists, including 4 developers, to support ongoing development and live operations. Participated in milestone planning, sprint planning, task estimation, and roadmap discussions to support efficient project delivery.

Jolly Battle

Online puzzle game featuring competitive multiplayer battles on [iOS](#) and [Android](#) with 1M+ downloads. Responsible for long-term product support, implementation of new features, system maintenance, and technical improvements. Worked with monetization and analytics SDKs, Firebase services, A/B testing, and performance optimization to ensure a stable and scalable live product. Supported the project as part of a focused development team of 2 engineers.

Jigsaw Puzzle by Jolly Battle

Mobile jigsaw puzzle game for [iOS](#) and [Android](#). Developed and maintained gameplay features while integrating analytics, monetization, and Firebase services. Participated in A/B testing initiatives, performance optimization, and code reviews to improve product quality and player experience. Worked closely with a multidisciplinary team of 7 specialists, including 2 developers, throughout the product lifecycle.
